Global Leader in:

EAS

High Theft

RFID

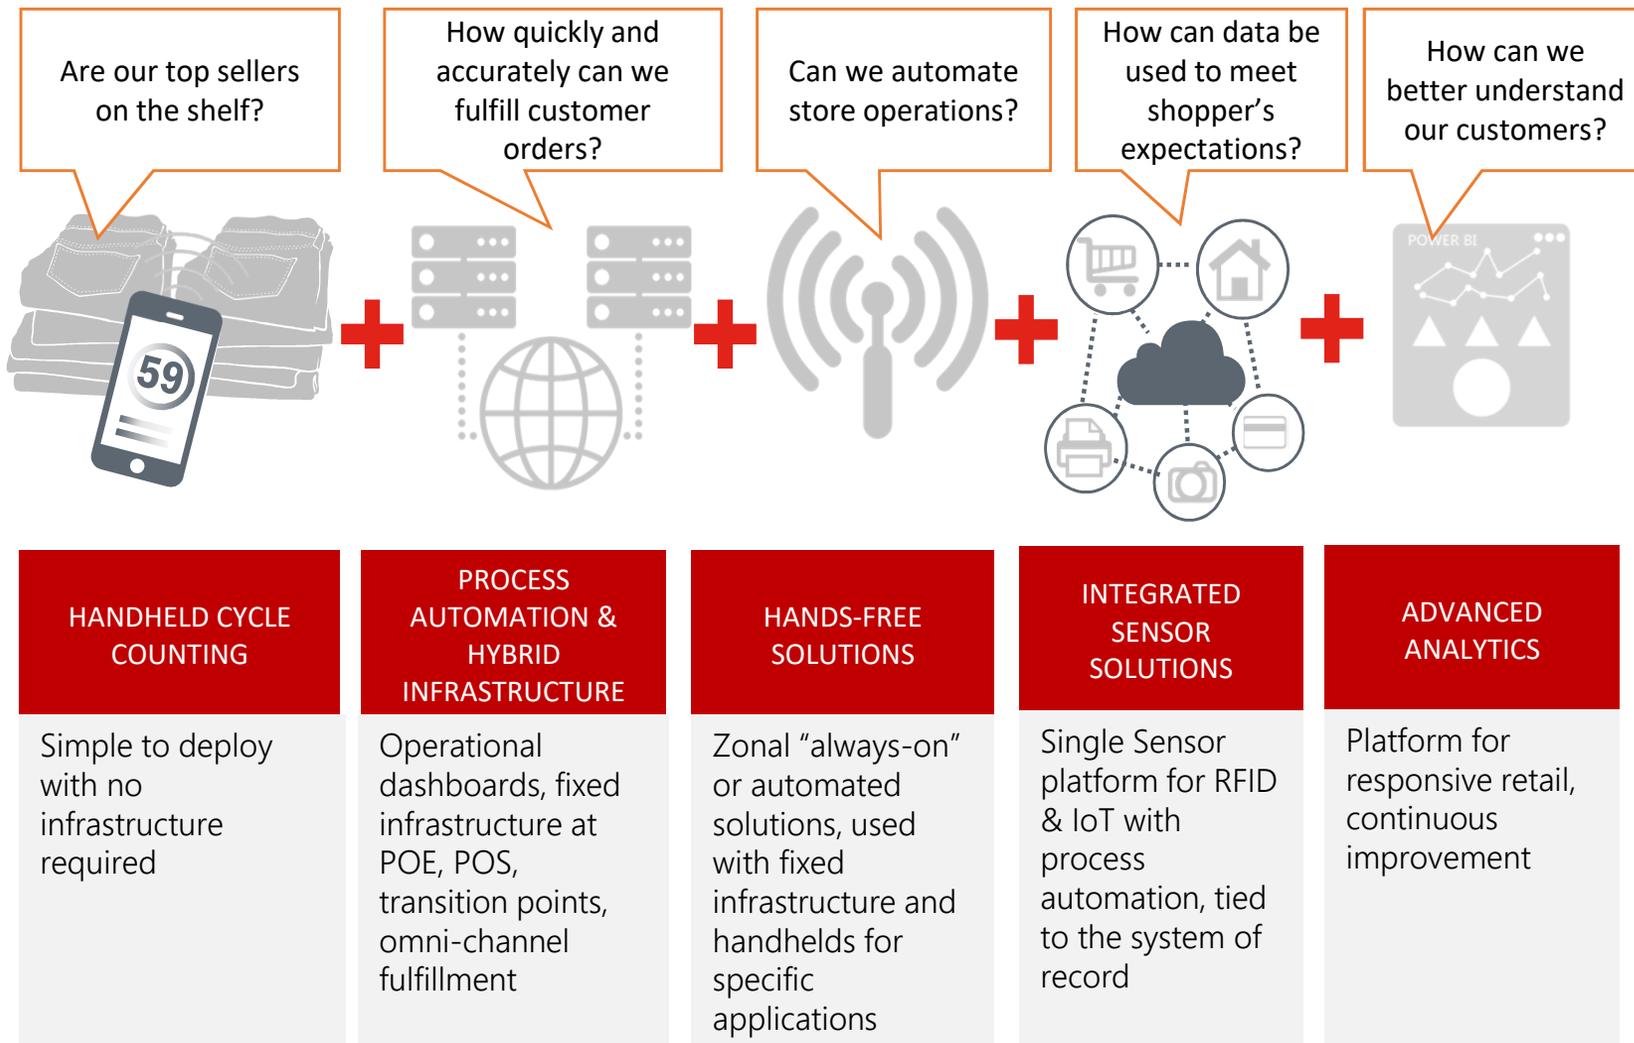

Apparel Labeling

“With RFID-enabled DCs and stores, we will improve our stock data accuracy and reduce not-on-shelf-but-on-stock so that customers find the right color, size and fit,” says **Joachim Wilkens**, head of functional IT and supply chain development at **C&A Europe**. “With RFID, we are building the basis for the C&A omni-channel strategy.”

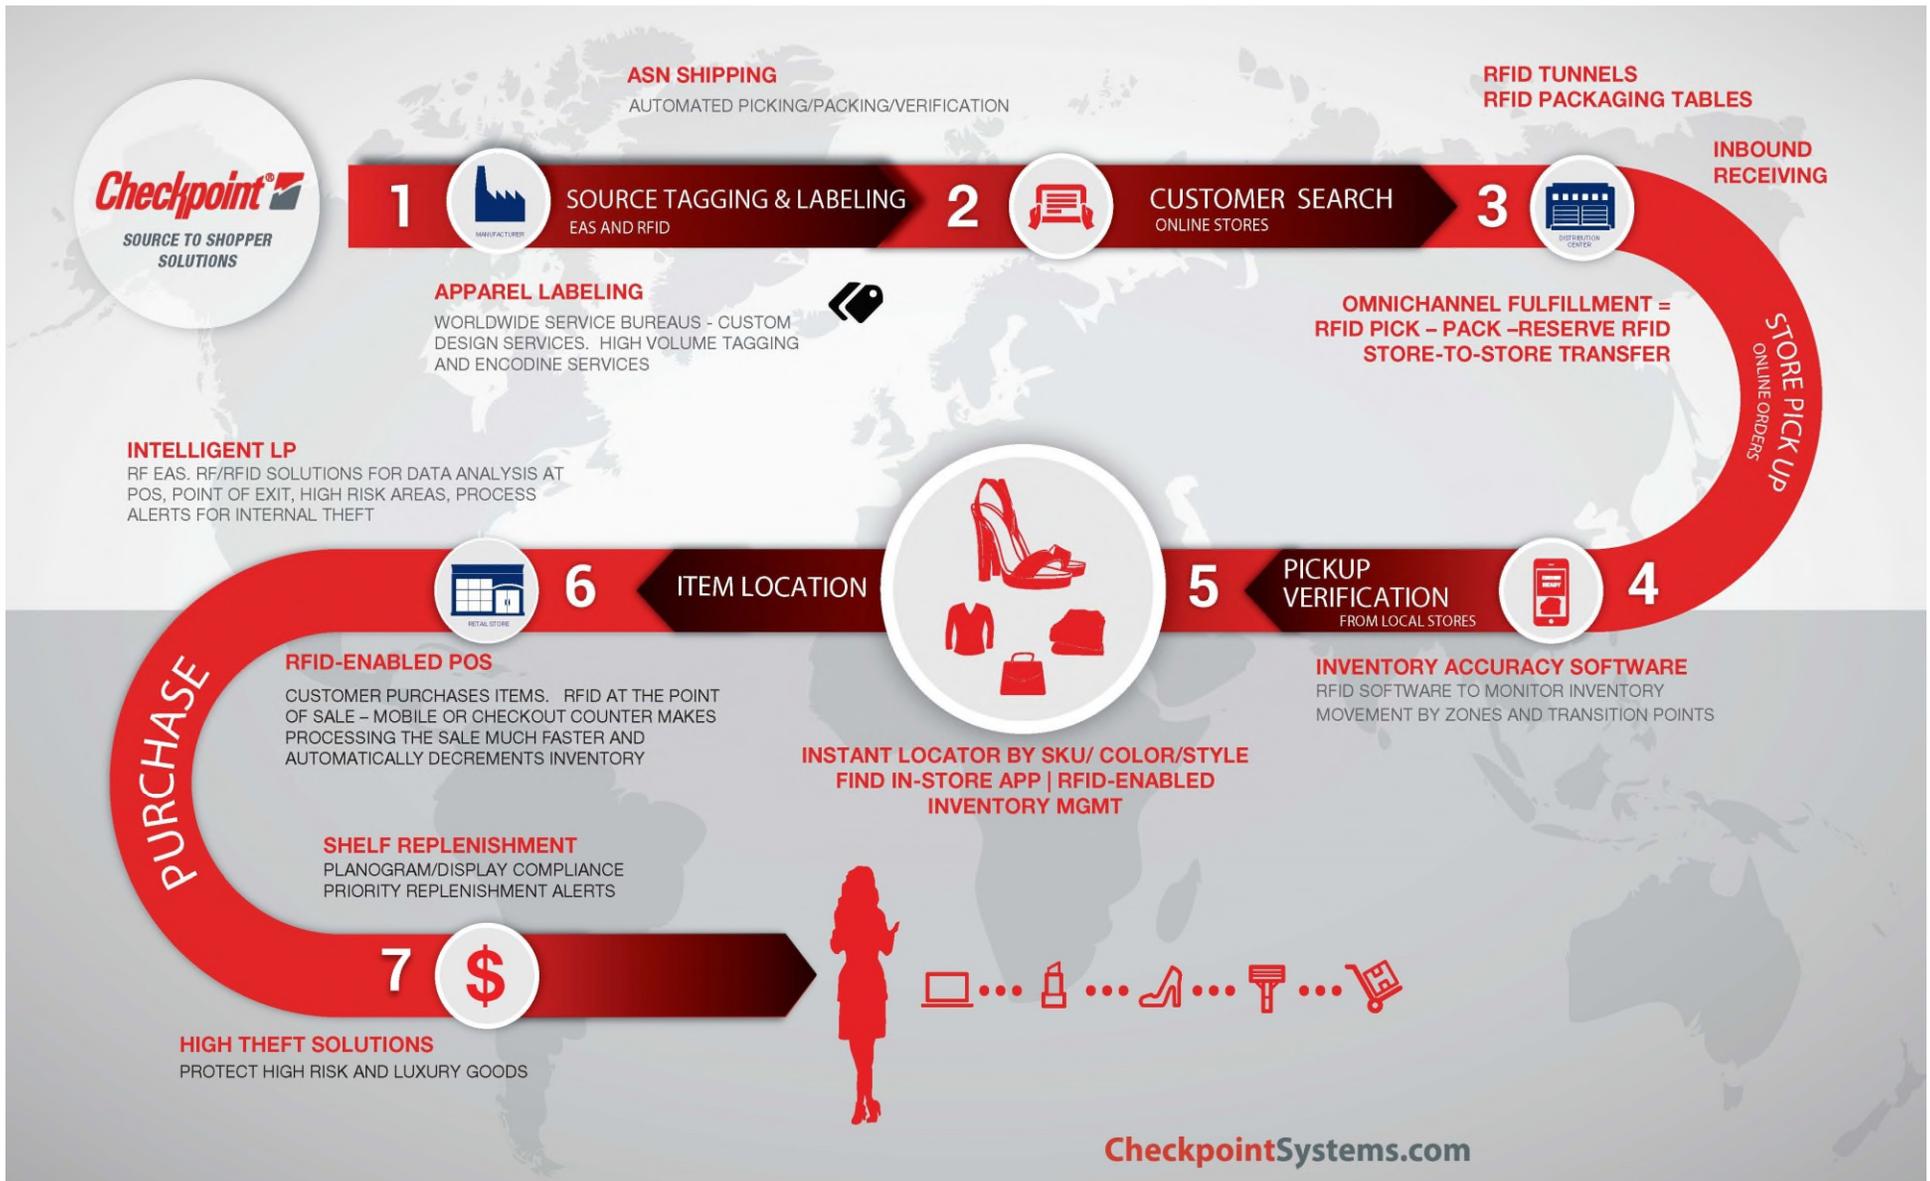

Evolution of RFID Implementations in Retail

The continuous development will bring more applications and use cases which will broaden the use of RFID and other sensor technologies in the future

Easing the Path of RFID Adoption

Checkpoint at the forefront of the RFID industry for 20 years

- The Checkpoint Platform for Retail IOT Software as a Service (SaaS) provides retailer's with open data processing capabilities.
- Effortless installation with streamlined businesses processes and enhanced reporting capabilities makes repetitive, time consuming tasks simpler for retailers
- As Checkpoint continues to pave the way with a modular architect, the path of RFID adoption is now simple

Experience how Checkpoint's most widely deployed RFID retail software leads beyond Retail Merchandise Visibility
